Video conference facilities

We can provide the following services:

Point to point video link
(main conference room)

Using the latest video codecs from Polycom with UltimateHD technology, we are able to provide a video link from 15Hatfields to any other video codec in the world with HD voice, HD video, and HD content for exceptional performance. Content is shared using unique and industry leading options and an internal MCU supports up to four participants in a single conference in high definition with stereo audio.

This system is controlled using the integrated Crestron system for user-friendly operation.

Prices start at £150 per hour or £600 per day

Point to point video link
(small meeting rooms)

Using the latest video codecs from Polycom with UltimateHD technology, we are able to provide a video link from 15Hatfields to any other video codec in the world with HD voice, HD video, and HD content for exceptional performance. Content is shared using unique and industry leading options.

Prices start at £100 per hour or £400 per day

All prices are exclusive of VAT.

Webcast

Utilising the in-house equipment along side our 100% reliable and scalable back end cloud system, we are able to stream live video and content to any internet enabled screen or device in the world. Our webcast system supports dynamic streaming, guaranteeing a consistent user experience. Streaming to any format is also supporting, which means your video can be watched live on PCs, Macs, iPhone, iPads and more.

Prices start at £250 per hour or £1,000 per day for up to 300 users. Additional users would incur an additional charge. Please note, this does not include a micro site or web interface which is often provided by the client, although we can stream as standard to a Webcast My Event page. Customised standard templates and completely customised micro sites are available on request.
